

Muhammad Naeem Muhammad Iqbal

Flutter Developer | Karachi, Pakistan | 3 years experience
tfanaeem@gmail.com | +92 321 8914005

Summary

Results-driven Flutter developer with 3 years of experience shipping production apps across social, e-commerce, live-streaming, and productivity domains. Expertise in BLoC and Riverpod, Firebase, Agora SDK, and RevenueCat. Apps with 500K+ combined downloads.

Skills

Languages: Dart, TypeScript, JavaScript, Python

Frameworks: Flutter, Node.js, Nest.js

State Management: BLoC, Riverpod, Provider, GetX

Tools: Firebase, Google Maps, Git/GitHub, Platform Channels, npm, CLI Development

Features: Video/Multimedia, Live Streaming/Agora, Real-Time Chat, In-App Purchases, AdMob, AI Integration, FFmpeg, Role-Based Access

Experience

Maze Digital - Mid-level Flutter Developer | 04/2024-Present | Karachi

- Shipped production Flutter apps across social, live-streaming, and productivity domains, contributing to products with 500K+ combined downloads.
- Built a client-side FFmpeg composition pipeline (HDR/SDR detection, layout overlays, skip-reencode) and a dual Socket.IO manager for chat and live notifications.
- Implemented Agora live streaming, RevenueCat subscriptions, Firebase auth/data, and role-based access in BLoC/Riverpod architectures.
- Partnered with design and backend teams to deliver pixel-perfect iOS and Android releases with queued uploads, offline caches, and performance-tuned video playback.

VativeApps - Junior Flutter Developer | 11/2023-03/2024 | Karachi

- Delivered Flutter features for client products using Provider/GetX, Firebase Authentication, Firestore, and Cloud Messaging.
- Integrated Google Maps, in-app purchases, and AdMob; profiled jank and reduced crash-prone media paths before store submission.
- Collaborated in Agile sprints with senior engineers, writing reusable widgets and handling REST API integrations on Android and iOS.

Visech Technologies - Junior Flutter Developer | 04/2023-10/2023 | Karachi

- Built Flutter screens and reusable UI components for early-stage mobile products, wiring REST APIs and local persistence.
- Implemented authentication flows, form validation, and basic state management while learning production Git and code-review practices.
- Supported QA and store-readiness checklists for Android/iOS builds, fixing layout and navigation bugs across device sizes.

Projects

floom-cli - Node.js, TypeScript, npm, Dart/Flutter, Firebase

- Designed and built an npm-published Flutter scaffolder (like NestJS schematics) with composable architecture, state, networking, DI, and optional Firebase templates.
- Added a generate command that detects existing architecture/state libraries and emits correctly-wired modules, repositories, and pages - plus CI-friendly flag-driven setup.

Knock Knock - Flutter, FFmpeg, Socket.IO, AWS S3, Provider, GetIt, Hive

- Built a client-side FFmpeg composition pipeline with HDR/SDR detection, movable video layout, and skip-reencode when no overlays are needed.
- Designed a dual Socket.IO manager (chat + notifications) with auth, reconnect/backoff, and facades for DMs, groups, and live updates.
- Shipped a Stories/Posts creator (camera, drawing, text, GIFs/stickers, collage) and a queued upload flow to S3, plus deep-link referrals and Hive chat caches.

Viewveer - Flutter, Agora, Firebase, Riverpod, Live Streaming

- Implemented short-video feed playback and live-streaming rooms with Agora SDK, including host/viewer roles and in-room chat.
- Built voice and video calling flows, social interactions, gift/coin monetization, and media upload paths.

Alpha Arc - Flutter, Riverpod, RevenueCat, Firebase, AI Integration

- Developed habit tracking, journaling, breathwork, and hydration modules for iOS and Android.
- Integrated AI coaching, members-only sales training, role-based access, and RevenueCat subscriptions.

Matchify - Flutter, Agora, Firebase, Riverpod, Real-Time Chat

- Built swipe matching, profile discovery, and realtime messaging with presence and push notifications.
- Integrated Agora audio/video calls, Firebase auth/chat, and AI-assisted matching recommendations.

Education

B.B.I.T. - Bachelor of Business & Information Technology (currently pursuing), Karachi, Sindh. Expected 08/2025.
